Respectfully,
J. C. PERRY,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.
 The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure.]

CEBU, P. I., April 4, 1901.

SIR: I have the honor to report the occurrence at this port of a case of bubonic plague. It occurred in a Filipino girl about 16 years of age and a resident of this town. She has not been away from here for several months. How she received the infection can not be determined. The case was reported to Major Surgeon Lippett, who has charge of the health department at this place, as a suspicious one. He invited me to see the patient with him, which I did, and found a typical case of plague, with a right femoral bubo. The girl was very sick when first seen and died the following day, having been sick four and one-half days. A complete post-mortem was not held, but the bubo was removed and found to present the pathological characteristics of a plague bubo. It
